EXPERIENCE

Python Programming Teaching Assistant(TA)

Helped students with python programming language. Held more than 6 hours of office hours each week and appointments to be of assistance.

Claude J. Clark Learning Center   start date: 10/11/2019 end date: current Computer Science and Math Tutor

Helped approximately 4 students a week with various math courses including calculus and programming.

IT Helpdesk   start date: 09/15/2017 end date: 01/01/2018

Worked in assisting students, faculty members, and employees on using my Plattsburgh account (password issues, general questions through phone), printer issues, and anything tech-related. Helping with on-campus printer issues or scam emails.

SKILLS

Web Development, Linux, Scrum, Git, GitHub, Netlify, Agile Methodologies, Leadership, Teamwork, React JS, Firebase, Windows/Linux Operating Systems, Object Oriented Programming.

PROJECTS

NaviCourse

Role: Front-end Developer

Used React framework to build a web application used for rating courses for students. NaviCourse was a team project.

BurghyDeals

Role: Front-end and Back-end Developer

Developed a web app for campus students to post items they want to sell and for other students to view what other students have posted and contact them if they wish to buy. Used React framework and Firebase. Able to create accounts and login users using Firebase secure Authentication. Only authenticated users are able to post items.
